PROFESSIONAL EXPERIENCE

Software Engineer Intern

05/2025 – Present

Addinex Technologies

New York, NY

- Developed full-stack clinician web portal (Next.js frontend, Nest.js backend) to track patient adherence across 5 studies.
- Containerized microservices with Docker and set up CI/CD via GitHub Actions to reduce deployment times by 70%.
- Implemented features for *Pillguin*, a React Native prototype, to replace a legacy app and enhance UX for 100+ patients.
- Built and tested HIPAA-compliant REST APIs using Postman to collect usage metrics for clinician decision support.

Software Engineer Intern

09/2024 – 04/2025

Cobalt Speech & Language

New York, NY

- Refactored Next.js/TypeScript codebase with Redux for state management, reusability, and cut runtime errors by 90%.
- Collaborated via Agile/Jira to plan features for MVP launch that ensured accessibility, responsiveness, and brand image.
- Visualized ML data using D3.js with data science team to help secure a \$12.5K investment in seed-stage venture.
- Built AWS cloud infrastructure (Lambda, S3, EC2) to enable scalable product launches and long-term growth.

IT Systems Analyst Intern

12/2024 – 02/2025

Metropolitan Transportation Authority

New York, NY

- Consulted HR to analyze existing payroll workflow and led a system redesign to align with compliance and audit needs.
- Performed risk analysis on a 1200+ user system to identify data exposure, downtime threats, and author mitigation plans.
- Coordinated with stakeholders to draft SOPs and ensure seamless integration without payroll disruptions.
- Built Next.js/PostgreSQL platform with SQL CRUD operations that cut processing time by 60% and errors by 80%.

LEADERSHIP & EXTRACURRICULARS

Co-Founder - Baruch Full Stack (BFS)

01/2025 – Present

- Established Baruch's premiere SWE club; secured charter approval and built a community for aspiring engineers.
- Led development of full-stack applications for other student orgs, local businesses, and Baruch-affiliated entities.

PROJECTS

Transportation Data Science Project - Northeast Big Data Innovation Hub & U.S. DOT Fellowship

- Cleaned and processed 2.3M+ NYC traffic records with Python and Pandas to develop road safety recommendations.
- Conducted exploratory analysis, enforced data ethics, and made 17 data visualizations with Matplotlib and PowerBI.
- Identified 50+ citywide accident hotspots through time series and geospatial analysis to support targeted intervention.
