EXPERIENCE

Pulp Internet – Software Development Intern

09/2024 – Present

- Led the **design** and **development** of Pulp's website (pulpinternet.com), refactoring existing **Next.js** and **TypeScript** codebases to resolve **100+ type inconsistencies**, enhance **maintainability**, eliminate **runtime errors**, and streamline **feature integration**, delivering a highly **responsive**, user-centric interface that strengthened Pulp's brand presence.
- Collaborated on developing the Suade app prototype using **React Native** and designed **REST APIs** to enable real-time debate conversations, ensuring optimized cross-platform performance on **iOS** and **Android**.
- Developed product demos for investment showcases, partnering with the **data science** team using **Agile** to visualize **machine learning data**, enhancing user engagement with complex datasets, and secured a **\$5,000 investment** for Pulp.
- Wrote scalable **AWS Lambda** functions for seamless integration with a **machine learning algorithm** and used **S3** for data storage, enabling the transition of Pulp's resources to a cloud-native architecture and laying the foundation for future scalability.
- Built **15+ interactive data visualizations** with **D3** from **Observable**, and integrated 3D models using **Spline** and **Blender**, ensuring **cross-browser compatibility** and responsive design in **Next.js** and **Three.js** applications.

CodePath – Tech Fellow

05/2024 – Present

- Mentored **250+ students** in honing **Python** and **Leetcode** problem-solving skills for **technical interviewing** (TIP 101), and supported students in building websites using **HTML**, **CSS**, **JavaScript**, and **Bootstrap** (WEB 101).
- Served as Baruch's point of contact, recruiting **30+ students** to CodePath programs.

Webacy – Web3 Security Data Analytics Extern

04/2024 – 06/2024

- Enhanced **risk assessment** and **data categorization** by analyzing and labeling **200+ smart contract** vulnerabilities, improving **business intelligence** accuracy, and bolstering **business analysis** skills.
- Performed frequency and correlation analysis with statistical tools to find **15+ contingencies** in **crypto** and **Web3** technologies.
- Leveraged **unsupervised machine learning** for **cluster analysis** and utilized **SQL**, **Python**, **Excel**, and **Tableau** to manipulate and visualize **10,000+ data points**, driving strategic business insights.

PROJECTS

Portfolio Website | Skills: Next.js, TypeScript, Framer Motion, shadcn/ui

- Created a **responsive** personal hub to showcase skills, projects, education, experiences, and contact information.

GitHub repository: <https://github.com/hasibshaif/Portfolio-Website>

Kronicle | Skills: React.js, Next.js, Node.js, TypeScript, Tailwind CSS, Framer Motion, MongoDB, Nylas

- Developed a full-stack Calendly-inspired scheduling platform with **Next.js**, leveraging **MongoDB** for event and profile storage.
- Integrated **Nylas API** for secure **authentication** and calendar sync, enabling seamless **Google Calendar integration**.
- Implemented **real-time** event sharing and availability updates, accounting for both registered and guest users.
